- AI & Leadership Certification Programs
- GPT Strategy + Enablement Sprints
- Playbook + Decision Protocol Development
- Supplier & Workforce Development for AI Transformation
- Leadership Pipeline Acceleration

Ebenum Equation prepares leaders to thrive in AI-powered environments– where clarity, collaboration, and trusted systems matter most. We develop teams who move fast, think forward, and build the future with integrity.

FEATURED AI GATEWAY WORKSHOPS

- › Build Custom GPTs
- › Create G.A.I.T.s (Generative AI Integrated Teams)
- › Ask Smarter Questions with AI
- › Use AI as a Strategic Thought Partner
- › Learn AI + Superworker Principles

STRATEGIC CAPABILITIES FOR THE AI ERA

- › AI + Leadership Playbook Integration
- › Building Custom GPTs for Teams
- › AI Governance & Ethical Foresight
- › Agentic Team Design
- › Coaching for AI-Enabled Decision Making
- › Training Content Design for LMS Systems

RECENT EXPERIENCE

(2022-PRESENT)

- › Develop custom learning programs for suppliers on warehousing, inventory management and fulfillment
- › Create custom micro-learning series to enable growth in tech
- › Multi-language coaching program for 100+ clients
- › Data analytics dashboards for storytelling
- › In- Person AI Summit for Supply chain
- › Data Center construction supplier development program
- › Coaching for Product Management
- › Keynote speakers for various summits and internal conferences
- › Workforce development program for Cybersecurity, Software Engineering, and UX/UI design

Leadership Development Case Studies

1

AI Uplift Across Supplier Ecosystem: From Curiosity to Confidence

**"I expected another AI workshop—what I got was real strategy to grow our business with XYZ Client."
– Supplier Participant, AI Summit 2025**

Challenge:

A client sought to accelerate AI readiness across its supplier network. Many supplier teams lacked clarity on how to apply AI tools to day-to-day operations, leading to uncertainty, inconsistent adoption, and missed innovation opportunities.

Solution:

Ebenum Equation designed and delivered a custom AI Summit, bringing together supplier reps from seven companies. Through immersive sessions, live demos, and tailored foresight frameworks (e.g., Signals of Change, GAITS, and Custom GPT Labs), the program enabled immediate activation, not just awareness application.

Results:

Supplier education was accelerated through workshops addressing the needs identified by internal stakeholders.

- 9.5/10 - Increase in openness to using AI daily
- 9.4/10 - Alignment with client's innovation vision
- 89%+ of attendees reported feeling more confident identifying AI opportunities for growth.

2

AI-Ready Leadership for Today's Principals

**"The hands-on work showed me how to create a podcast, streamline my day, and think differently about leadership."
– Participant**

Challenge:

Principals in Miami-Dade County Public Schools (M-DCPS) were navigating mounting instructional and operational complexity. While AI tools were becoming available, most leaders lacked confidence in how to apply them to real leadership scenarios, from data usage to communication and instructional planning.

Solution:

Ebenum Equation led an immersive AI leadership workshop for M-DCPS principals, introducing AI as a strategic thought partner in daily school operations. The session combined foresight frameworks, GPT customization, and hands-on demos with tools like Copilot and Notebook LM. Principals applied AI immediately to tasks like podcast creation, email triage, data usage, and instructional planning.

Results:

The session earned top marks across all categories.

- 4.93/5 overall workshop evaluation
- 4.88/5 average AI & Leadership content rating
- 4.96/5 for both usefulness and instructor expertise

Principals reported immediate use of tools like Notebook LM and GPTs for staff meetings, email triage, and lesson planning.
